Engineer Software

{ Infrastructure as Code }

Servers you can rebuild from versioned configuration

The whole setup written down as files, so it can be recreated exactly and never lives only in one person's head.

Still working out what you need?

Tell us what is going wrong, or what you are trying to build. We will tell you what it would take, roughly what it would cost, and whether we are the right people for it.

From 1,400 DKK an hour, excluding VAT — and less per hour on a longer booking.

Turn the service into a result

Make “Infrastructure as Code” serve a business outcome. We can connect the technical work to the users, operations and decisions it needs to support. The whole setup written down as files, so it can be recreated exactly and never lives only in one person's head.

Examine the relevant work

Use the related work on this page to examine our approach. Ask about the tradeoffs and the conditions behind each result. Public services on a small server — 512 MB running an entire company's estate

Public services on a small server Get in touch →

Public services on a small server

Hosted the company’s public services on a single-core 512 MB host — a git forge, a web server for seven domains, Tor, two alternative-protocol servers and intrusion banning — treating 464 MB of usable memory as the design constraint; backup automation is a separate implementation.

Your code on your own server

Deployed the company's own git forge on Soft Serve, private by default with no web panel and its SSH port bound to loopback behind a jump host, and made the landing page in front of it a build artefact of the main site rather than a hand-kept copy.

Published a readable Tor onion mirror

Published the site as a Tor onion mirror on a readable address beginning engineer, with the key generated off the host so it never reached this repository or a laptop, and left it the one front door of four that is never counted.

Looking for Infrastructure as Code?

Use the linked work to judge relevant experience. Tell us what you need to build; we can discuss the scope, delivery approach and handover.
